

Online workshop with virtual field tours in North and Eastern Europe and northeastern America

**Dialogue on governance to develop sustainable forest landscapes
for production of wood for energy and the bioeconomy**

Program, Tuesday, 26 October 2021, 14.00-18.00 Eastern European Summer Time (EEST)

Where and when can forest bioenergy help to save carbon emissions, and how to calculate or model this?

14.00-14.05	Inge Stupak, workshop coordinator, Associate professor, University of Copenhagen	Welcome and workshop opening
14.05-14.18	Niclas Scott Bentsen (moderator), Associate professor, University of Copenhagen	Welcome and framing of the session
14.20-14.48	Viorel Blujdea, Forestry Faculty, Transilvania University of Brasov, Romania, Romania	Designing fair and effective forest carbon accounting rules for EU member states as a basis for policy and incentive development – challenges and solutions (preliminary title, tbc)
14.50-15.18	Annikki Mäkelä, Professor, University of Helsinki, Finland	Forest carbon quantification by modelling: How to assess if unmanaged or managed forests generate greater climate change mitigation benefits, and how forest management systems and choices influence the level of greenhouse gas emission savings that can be achieved in a forest landscape? (preliminary title, tbc)
15.18-15.28		Break
15.30-15.43	Ondrej Tarabus, Director of Climate Programme, Preferred by Nature	Forest carbon and greenhouse gas emission information and sustainability criteria in certification standards and their verification (preliminary title, tbc)
15.45-16.13	Carolyn Smyth, Research scientist, Pacific Forestry Centre, Canadian Forest Service, Victoria, British Columbia	Integrated assessment of greenhouse gas emissions for whole forest supply chains with bioenergy scenarios: Understanding the need for integrated modelling of greenhouse gas emission savings to answer questions about where and how much forest bioenergy potentially can reduce greenhouse gas emissions to atmosphere compared to alternative forest management options and energy systems? (preliminary title, tbc)
16.15-16.25		Break
Panel discussion with speakers and additional contributors		
16.25-16.30	Introduction by moderator, Niclas Scott Bentsen, University of Copenhagen	
16.31-16.36	Raimonds Kašs, Acting Director of Climate Change Department in Ministry of Environmental Protection and Regional Development of the Republic of Latvia	The contribution of forests to achieve national climate targets of Latvia. (preliminary title, tbc)
16.37-16.42	Enviva Biomass	Developing wood pellet producer tools to document carbon sustainability at the level of sourcing area (preliminary title, tbc)
16.43-16.48		
16.49-16.54		
16.54-17.55	Discussion and round-off	Discussion and round-off
17.55-18.00	Announcement of the next session	Research needs to underpin future policies related to sustainable forest management and wood end-uses.
